Yuva Udyami Project Declaration

This pitch deck is based on a project developed through the Yuva Udyami program.

Jan Aushadhi Mobile Application

The idea was developed together as a team project under the Yuva Udyami initiative.

This submission has been adapted individually for the IET Final Project evaluation.

Individual Contribution

Name: Bhavik Kalva

Role: *Frontend & Backend Developer API Design*

Key Contributions:

Web Scraping

Used Api's for web scraping

Used 3d Animations in Flutter for better Ui From frontend point of view

FastAPI

Used FastApi for integration of ML Model for our App

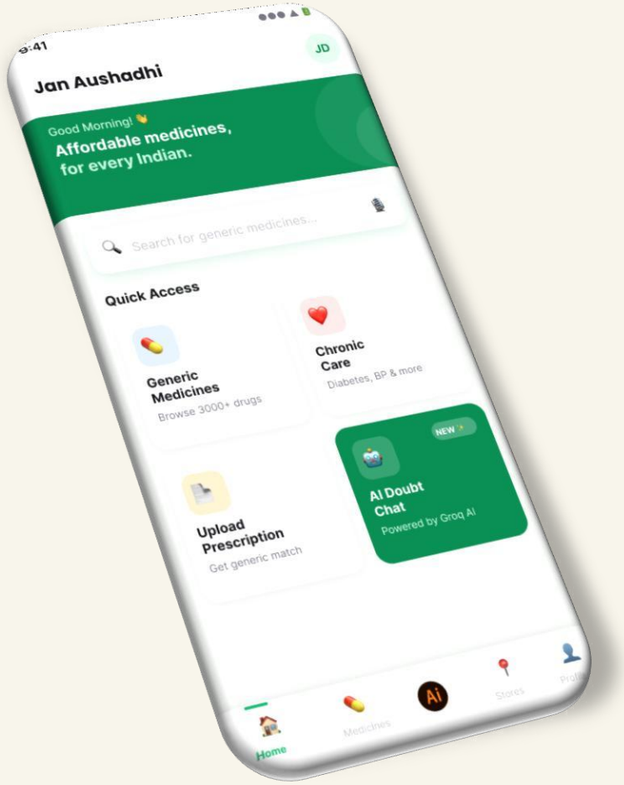
PyTorch

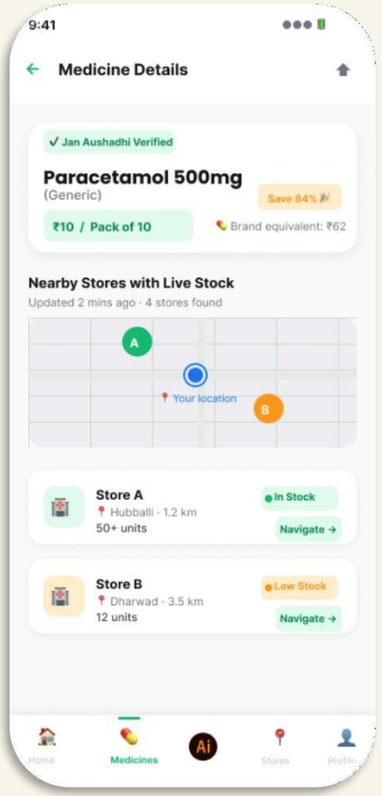
for ML demand forecasting

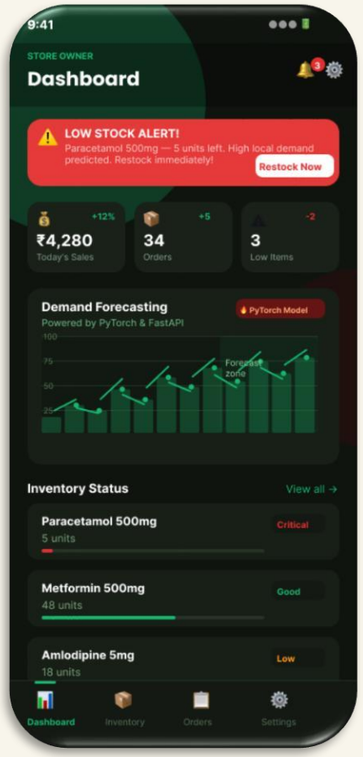
groq BUILD FAST

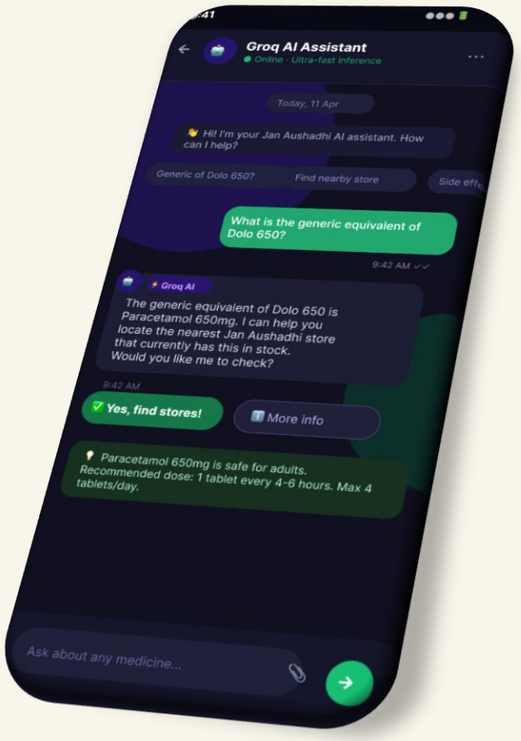
for AI doubt resolution to power the backend architecture.

Jan Aushadhi Mobile Application









Helping Remote Communities Access Affordable Medicine *A practical digital tool for finding medicines and improving healthcare access*

Team Size, Background, Strength/Capability and Resources

Team Members

KalvaBhavik(25BCS063)

- *Designation:Frontend & Backend Developer, API Design, ML Integration*
- *Qualification: B.Tech CSE*
- *Skils: Mobile app development, Flutter and Dart, backend integration, PyTorch, Groq Api*

SampreethPagadala(25BCS152)

- *Designation: Founder, Product Lead & Backend Developer*
- *Qualification: B.Tech CSE*
- *Skils: Firebase backend integration, app development using Java(Android Native), AI tool use for development*

RohitDesai(25BCS142)

- *Designation: UI/UX Designer & Frontend Developer*
- *Qualification: B.Tech CSE*
- *Skils: User interface design, frontend development, accessibility design*

PrasanthPalchuri (25BCS110)

- *Designation: Frontend Developer*
- *Qualification: B.Tech CSE*
- *Skils: UI design, frontend development(Web developer), cybersecurity*

Problem Statement and Customer Segment

What problem is your innovation trying to solve?

Customers must visit pharmacies in person to check medicine availability. If unavailable, they waste time and money travelling — especially from remote areas. There is no digital way to confirm stock in advance.
Jan Aushadhi pharmacy owners lack digital tools to track inventory analytics, resulting in frequent stockouts on high-demand items and missed revenue opportunities.

Who is your customer segment?

- *Distant patients traveling from remote areas*
- *Elderly patients with mobility challenges*
- *Low-income families looking for affordable medicines*
- *Patients who need urgent access to medication*

Customer Validation Done:

- • Spoke with 50+ customers across user & pharmacy owner segments
- • Most end-users requested medicine availability tracking before travelling
- • Pharmacy owners expressed clear need for inventory analytics and restock alerts

Product/Solution - Innovation

Jan Aushadhi Mobile Application

The app gives users real-time information on medicine availability, pricing, and expiry dates across Jan Aushadhi pharmacies. Users can search for medicines, check stock status, and plan their visits without wasted trips.

How it solves the problem:

The app helps users check medicine availability before they travel. This saves time and money, especially for people coming from remote areas or those who need medicines quickly.

Is it first of its kind or incremental?

Incremental innovation - it uses existing tools like a mobile app and real-time database, applied in a practical way to improve access to affordable medicines in India's healthcare system.

Unique Differentiators:

Feature	Detail
Real-time Data Sync	Firestore integration for instant availability updates across all stores
User-Friendly Design	Optimised for elderly & low-tech users with accessible UI
Affordability Focus	Built exclusively for Jan Aushadhi government-subsidised medicines
Offline Capability	Works with limited connectivity in remote areas
Multi-language Support	Accessible to a diverse, multilingual user base
Predictive Inventory Insights	PyTorch neural net analyses search trends → pushes low-stock alerts to owners
AI Doubt Resolution (Groq)	Ultra-low latency Groq LPU chatbot — instant generic alternatives & dosage help
Pharmacy Revenue Growth	Live inventory broadcast increases footfall; predictive alerts cut lost sales

Product/Solution - Readiness Level

Current Stage: Early Traction

The Jan Aushadhi Mobile Application has moved beyond the proof-of-concept stage and is now in early traction, with real-world use and user feedback.

Development Milestones Achieved:

- *Backend infrastructure deployed (Firestore database)*
- *Desktop application for pharmacy staff*
- *Real-time data sync system*
- *User interface improved for accessibility*
- *Official NGO acceptance and approval*

Socio-Economic Impact of the Product

How the app affects society and the environment:

Improving access to healthcare

- *Helps remote users find affordable medicines faster*
- *Reduces delays in treatment for urgent health needs*

Economic impact

- *Saves patients transportation costs by reducing wasted trips*
- *Reduces time loss and missed work*
- *Supports the Jan Aushadhi system*

Social support

- *Helps elderly and mobility-cha lenged patients*
- *Reduces gaps in healthcare access between urban and rural areas*
- *Supports local healthcare partnerships*

Environmental benefits

- *Reduces unnecessary travel and carbon emissions*
- *Cuts down on wasted trips andfuel use*
- *Encourages more sustainable healthcare practices*

Scalability potential

- *The model can be used by other pharmacy networks*
- *It may also work for other healthcare products and services*

Possible future patent opportunities:

- Real-time medicine availability tracking system
- Offline-first design architecture for low-connectivity areas
- Groq LPU-accelerated AI chatbot for pharmacy patient support
- PyTorch-based predictive demand forecasting for generic medicine networks

Publication Opportunities:

- *Healthcare technology and digital inclusion journals*
- *mHealth conference papers*
- *Social entrepreneurship and impact innovation publications*
- *Ai in healthcare – low resource deployment case studies*

Financial Plan (Dharwad-Focused Growth)

Our financial plan is based on a lean, low-cost model focused on gradual expansion across 21 Jan Aushadhi stores in Hubballi-Dharwad.

Year	Stores	Revenue	Expenses	Net	Focus
Year 1	5-8 stores	₹1.0-1.4 Lakhs	₹80,000-₹1.0 Lakh	₹0-₹4 Lakhs	Initial deployment and validation
Year 2	10-15 stores	₹2.0-2.7 Lakhs	₹1.2-1.5 Lakhs	₹1.0-₹1.2 Lakhs	Expansion within Dharwad
Year 3	Up to 21 stores (Full Coverage)	₹3.5-4 Lakhs	₹1.8-2.2 Lakhs	₹1.7-₹2 Lakhs	Achieving full Dharwad coverage
Year 4	Stability phase	₹4-5 Lakhs	₹2-2.5 Lakhs	₹2-₹2.5 Lakhs	Improved profitability
Year 5	Sustained operations	₹5-6 Lakhs	₹2.5-3 Lakhs	₹2.5-₹3 Lakhs	Sustained operations within Dharwad

Monthly operational cost is estimated at ₹8,500-₹12,500. Initial implementation cost is ₹50,000 (one-time, already developed).

60-Month Financial Projection - Months 1-20

Month	Year	Monthly Revenue	Monthly Expenditure	Monthly Profit (or Loss)
Month 1	Year 1	₹0	₹2,500	-₹2,500
Month 2	Year 1	₹0	₹2,500	-₹2,500
Month 3	Year 1	₹0	₹2,500	-₹2,500
Month 4	Year 1	₹0	₹2,500	-₹2,500
Month 5	Year 1	₹8,000	₹2,500	₹5,500
Month 6	Year 1	₹8,000	₹2,500	₹5,500
Month 7	Year 1	₹8,000	₹2,500	₹5,500
Month 8	Year 1	₹8,000	₹2,500	₹5,500
Month 9	Year 1	₹8,000	₹2,500	₹5,500
Month 10	Year 1	₹8,000	₹2,500	₹5,500
Month 11	Year 1	₹8,000	₹2,500	₹5,500
Month 12	Year 1	₹8,000	₹2,500	₹5,500
Month 13	Year 2	₹9,000	₹3,000	₹6,000
Month 14	Year 2	₹9,000	₹3,000	₹6,000
Month 15	Year 2	₹9,000	₹3,000	₹6,000
Month 16	Year 2	₹9,000	₹3,000	₹6,000
Month 17	Year 2	₹9,000	₹3,000	₹6,000
Month 18	Year 2	₹9,000	₹3,000	₹6,000
Month 19	Year 2	₹9,000	₹3,000	₹6,000
Month 20	Year 2	₹9,000	₹3,000	₹6,000

60-Month Financial Projection - Months 21-40

Month	Year	Monthly Revenue	Monthly Expenditure	Monthly Profit (or Loss)
Month 21	Year 2	₹9,000	₹3,000	₹6,000
Month 22	Year 2	₹9,000	₹3,000	₹6,000
Month 23	Year 2	₹9,000	₹3,000	₹6,000
Month 24	Year 2	₹9,000	₹3,000	₹6,000
Month 25	Year 3	₹10,500	₹3,600	₹6,900
Month 26	Year 3	₹10,500	₹3,600	₹6,900
Month 27	Year 3	₹10,500	₹3,600	₹6,900
Month 28	Year 3	₹10,500	₹3,600	₹6,900
Month 29	Year 3	₹10,500	₹3,600	₹6,900
Month 30	Year 3	₹10,500	₹3,600	₹6,900
Month 31	Year 3	₹10,500	₹3,600	₹6,900
Month 32	Year 3	₹10,500	₹3,600	₹6,900
Month 33	Year 3	₹10,500	₹3,600	₹6,900
Month 34	Year 3	₹10,500	₹3,600	₹6,900
Month 35	Year 3	₹10,500	₹3,600	₹6,900
Month 36	Year 3	₹10,500	₹3,600	₹6,900
Month 37	Year 4	₹12,000	₹4,300	₹7,700
Month 38	Year 4	₹12,000	₹4,300	₹7,700
Month 39	Year 4	₹12,000	₹4,300	₹7,700
Month 40	Year 4	₹12,000	₹4,300	₹7,700

60-Month Financial Projection - Months 41-60

Month	Year	Monthly Revenue	Monthly Expenditure	Monthly Profit (or Loss)
Month 41	Year 4	₹12,000	₹4,300	₹7,700
Month 42	Year 4	₹12,000	₹4,300	₹7,700
Month 43	Year 4	₹12,000	₹4,300	₹7,700
Month 44	Year 4	₹12,000	₹4,300	₹7,700
Month 45	Year 4	₹12,000	₹4,300	₹7,700
Month 46	Year 4	₹12,000	₹4,300	₹7,700
Month 47	Year 4	₹12,000	₹4,300	₹7,700
Month 48	Year 4	₹12,000	₹4,300	₹7,700
Month 49	Year 5	₹13,500	₹5,100	₹8,400
Month 50	Year 5	₹13,500	₹5,100	₹8,400
Month 51	Year 5	₹13,500	₹5,100	₹8,400
Month 52	Year 5	₹13,500	₹5,100	₹8,400
Month 53	Year 5	₹13,500	₹5,100	₹8,400
Month 54	Year 5	₹13,500	₹5,100	₹8,400
Month 55	Year 5	₹13,500	₹5,100	₹8,400
Month 56	Year 5	₹13,500	₹5,100	₹8,400
Month 57	Year 5	₹13,500	₹5,100	₹8,400
Month 58	Year 5	₹13,500	₹5,100	₹8,400
Month 59	Year 5	₹13,500	₹5,100	₹8,400
Month 60	Year 5	₹13,500	₹5,100	₹8,400

Investment Ask

DHARWAD FOCUS

We are asking for ₹50,000 to scale the solution across all 21 Jan Aushadhi stores in Hubballi –Dharwad. Since our infrastructure costs are low and the system is already developed, ₹50,000 is sufficient to support the initial scaling phase in Dharwad

Use of Funds

Firebase hosting and infrastructure scaling

Gemini API integration
Groq API integration

Store onboarding and support

System maintenance and optimization

Expected Outcome

- *Full Dharwad coverage (21 stores)*
- *2,000–5,000 users onboarded*
- *Stable local deployment that can be maintained over time*

Valuation & Equity

Estimated valuation of the project: ₹2,50,000

Equity offered: 10%

This valuation is based on:

- *A working prototype already deployed*
- *Early user validation*
- *Low-cost and scalable model focused on Dharwad region*

Note: *This is a low-cost, focused implementation for a controlled regional rollout.*

Business Model Canvas

Below is a 9-block Business Model Canvas showing the core parts of the Jan Aushadhi Mobile Application business model.

Key Partners

- *Jan Aushadhi NGO*
- *Health departments*
- *Firebase*
- *Gemini API providers*

Key Activities

- *App development*
- *Store onboarding*
- *Real-time data management*
- *User support*

Key Resources

- *Mobile app*
- *Firebase infrastructure*
- *Development team*
- *AI integration*

Value Proposition

- *Real-time medicine availability*
- *Affordability focus*
- *Accessibility for remote areas*
- *Offline capability*

Customer Relationships

- *Direct support*
- *Community engagement*
- *Feedback loops*

Channels

- *Direct B2B partnerships*
- *Government alignment*
- *App stores*

Customer Segments

- *Remote patients*
- *Elderly patients*
- *Low-income families*
- *Urgent medication seekers*

Revenue Streams

- *Pharmacy subscription*
- *₹1,000–₹2,000/month*

Cost Structure

- *Firebase hosting*
- *Gemini API*
- *Team salaries*
- *Infrastructure*

Competitive Landscape

Below is a simple comparison of our app and keycompetitors in the market.

Feature	Our App	Tata 1mg	PharmEasy	NetMeds
Focus on Affordability	✓	✗	✗	✗
Real-time Stock Visibility	✓	✓	✓	✓
Jan Aushadhi Integration	✓	✗	✗	✗
Remote Area Accessibility	✓	✗	✗	✗
Offline Capability	✓	✗	✗	✗
AI Doubt Resolution (Groq)	✓	✗	✗	✗
Predictive Inventory (PyTorch)	✓	✗	✗	✗
Medicine Reservation (B2C Fee)	✓	✗	✗	✗

Technology Stack & Justification

Frontend: Flutter

Used for cross-platform development and quick UI updates

Backend: Firebase

Supports a real-time database and room to scale

Database: Firestore

Keeps data synced in real time

AI Integration: Gemini API

Helps with smart search and recommendations

Why this stack:

- *Real-time performance*
- *Scales to support multiple stores*
- *Cost-effective for an early-stage startup*
- *Works well in low-connectivity environments*

Market Landscape - Market Potential, Competitors

Our immediate focus is covering all 21 Jan Aushadhi stores in Hubballi–Dharwad.

Market Scope

We are limiting our operations to the 21 Jan Aushadhi stores in Hubballi–Dharwad for now. This is a focused pilot in one region so we can test the model before expanding.

TAM (Total Addressable Market):

- *India pharma market: ~$50+ billion annually*
- *10,000+ Jan Aushadhi stores across India*
- *Large base of patients looking for low-cost generic medicines*

SAM (Serviceable Addressable Market):

- *Karnataka Jan Aushadhi stores: ~800–1,000*
- *Hubballi–Dharwad region: ~21 stores, Population (Hubballi–Dharwad): ~12–15 lakh*

SOM (Serviceable Obtainable Market):

Year 1:

- *5–8 stores onboarded*
- *2,000–3,000 registered users*
- *500–1,000 monthly active buyers*

Competitors & Differentiation:

- ***Direct Competitors:*** *Tata 1mg, PharmEasy, NetMeds, local private pharmacies*
- ***Our Advantage:*** *Focus on affordability*
- ***Market Gap:*** *No existing solution focused on Jan Aushadhi and remote areas*
- ***Competitive Edge:*** *Real-time sync, accessibility design, government alignment*

Market Potential (Bottom-up):

- *10+ users validated in the first phase*

Business Model & GTM Strategy

Revenue Model - Pricing Strategy:

Primary Revenue Streams:

- ***Pharmacysubscriptionmodel***
- *Monthly subscription per store: ₹1,000 – ₹2,000*
- *Covers app maintenance, updates, and support*

Revenue Forecast (2 Years):

- *Year 1: 8 stores onboarded, ₹1,500 average subscription*
- *Revenue: 8 ×1,500 ×12 =₹1,44,000 per year*
- *Growth path: 2x expansion with additional revenue streams*

Business Model / Go-To-Market Strategy:

Channel Strategy:

- ***Direct B2B:*** *Partnership with Jan Aushadhi pharmacies*
- ***Governmentalignment:*** *Work with health departments*

User Acquisition & Outreach:

- ***In-storepromotion:*** *Pharmacy staff will inform customers about the app during visits*
- ***Posters&QR codes:*** *Displayed at Jan Aushadhi stores for easy app access*
- ***Word-of-mouth:*** *Encouraging early users to refer others*
- ***Localawareness:*** *Small campaigns in nearby communities and hospitals*

Trust Building:

- ***Backed by JanAushadhisystem(governmentinitiative)***
- ***Real-timeverified datafrom pharmacies***
- ***Simple andreliable experience for elderly users***
- ***Initialvalidation from50+usersandNGOsupport***

GTM Phases:

Phase 1 (0–3Months)

- *Strengthen 1 live store deployment*
- *Collect user feedback*
- *Improve app performance*
- *Prepare onboarding material*

Phase 2 (3–8Months)

- *Expand to 5–8 Jan Aushadhi stores*
- *Show revenue uplift*
- *Improve operational workflow*

Phase 3 (8–18Months)

- *Onboard all 21 stores in Hubbali–Dharwad*
- *Build a localized digital medicine network*
- *Improve logistics and customer retention*

Total Budget

Our funding need is small and mainly for scaling the infrastructure. The money will go toward Firebase paid-tier database hosting for secure real-time operations and the Gemini API subscription for AI-based medicine search, prescription help, and smart suggestions. We do not need funding for hiring or software purchases. The product is already built and working for one store.

Monthly Total:

Firebase +Gemini has a monthly subscription around ₹2000 - ₹6000 depending around the use case

What if you don't get funding?

Even without outside funding, we have already built and deployed a working version of the app for one Jan Aushadhi store in Hubballi–Dharwad. It is currently in use with optimized Firebase infrastructure and supports core features like medicine availability tracking and basic store management. This single-store setup is a live proof of concept that shows the app works technically, is accepted by users, and can run in practice. With funding, we plan to expand this tested model to 21 Jan Aushadhi stores across Hubballi–Dharwad.

Conclusion & Call to Action

Jan Aushadhi Mobile Application: A Practical Solution for Healthcare Access

What We've Achieved:

- *✓ Deployed a working mobile application*
- *✓ Tested with 10+ users and NGO partners*
- *✓ Shown value in improving healthcare access*

Why This Matters:

- *Current solutions do not address affordability and accessibility*
- *Our app helps connect healthcare needs with medicine availability*
- *It supports the government's Jan Aushadhi mission*

Our Vision:

Our goal is to help Jan Aushadhi Kendras in Hubbali–Dharwad by onboarding 21 stores in the first phase and making affordable medicines easier to access for the local community.

We are starting with one store so we can validate the product, improve the experience, and build sustainable impact before expanding beyond Dharwad.

Let's Improve Healthcare Access Together
